

THE WORLD OF CRYSTAL CLEAR WATER

I KNOW WHAT I DRINK

What comes out of my tap?

I will not buy expensive carbon filters any more. I save money by not buying bottled water.

I LOVE THE OUTDOORS

Can I swim here? Can I drink from this spring?

I map the quality of natural water sources and find main polluters.

I LOVE MY FISH

Fish are my life and I want to give them the best.

I will have everyday reports of what my fish live in.

I KEEP MY POOL CLEAN

My family pool – I deserve it clean.

I keep my outdoor pool water beautiful regardless of the weather.

AQUACARE

INNOVATION IN AQUACARE

No glass optics

All mechanical and optical parts are replaced with plastic. Whole product is fully 3D printable.

No electronics or batteries

AquaCare does not require any electronics and power source. It just uses smartphone hardware.

Durability

AquaCare is made of hard plastic. It can fall on concrete and it still works.

Compact and mobile

It is so small that you can have it in your pocket and take it anywhere you go.

Cloud storage and sharing

Water quality data are stored in a cloud and shared as a map. You have an overview of the water in your neighborhood.
